

Enviralum™, entrances and window wall systems - the product of choice for architects and specifiers. Our products are designed to offer beauty, performance and value. All of our products are pre-fabricated and shop glazed to offer the highest quality and ease of installation.

Our systems are tested to Florida Building Code, High Velocity Hurricane Zone (HVHZ), the highest building standard in the nation. We offer variable glazing options within the product core designs to provide optimum flexibility in aesthetics and performance.

ENV-4500 Flushed Glazed Storefront System

The ENV-4500 is a versatile performing system providing a solution for many new and retrofit installations including field glazed traditional non-impact need as well as a unique unitized shop glazed impact system.

The ENV-4500 is engineered to provide structural performance and price value savings with compact 1 ¾" x 4 ½" framing members. The system has the ability to be anchored at top and bottom only, and to be shop glazed, which saves valuable field installation labor, making the ENV-4500 the most price competitive system in the market. The ENV-200 narrow stile door and ENV-350 medium stile door both can be incorporated into the ENV-4500 system providing the most flexible entrance options in the industry.

Product Features & Performance

- Maximum design pressure +/-80 Impact
- Maximum design pressure +/-120 non-impact
- Water rating 12 psf
- 1/4" Tempered monolithic glass Non-impact
- 7/16" Heat Treated Laminated glass Impact
- Sill flashing available
- Unsecured jambs
- White powder coated finish
- Bronze & clear anodized
- Kynar & custom colors are available options
